

1 Emboîter les semelles métalliques

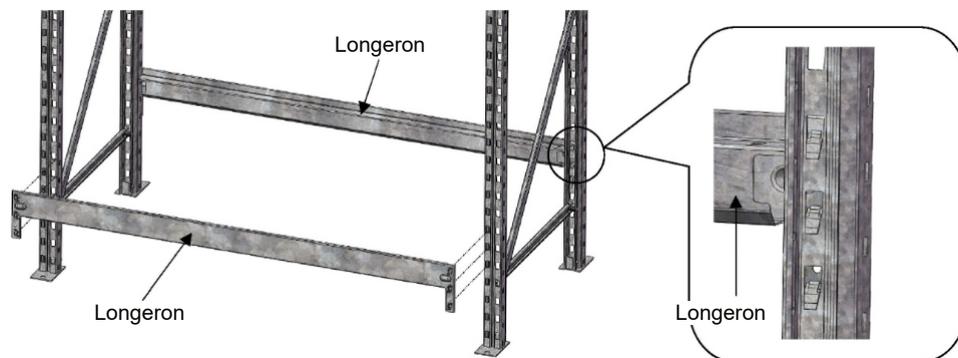

2 Assemblage des échelles

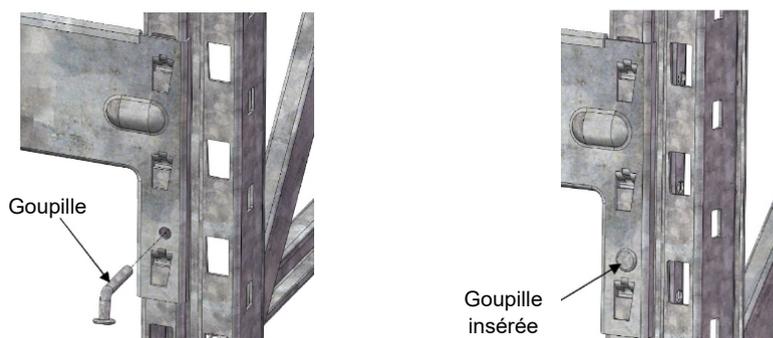

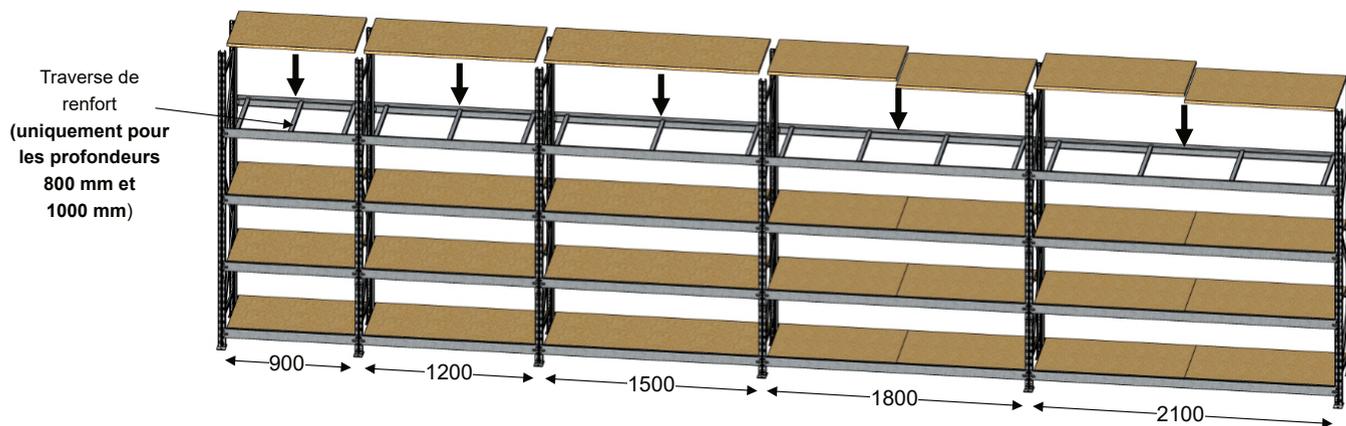

3 Emboîter les longerons

4 Verrouiller les longerons

5 Poser les platelages

Nombre de traverses par niveau

| Longueur (mm) | Profondeur (mm) | | |
|---------------|-----------------|-------------|-------------|
| | 600 | 800 | 1000 |
| 900 | 0 (260 kg*) | 3 (220 kg*) | 3 (180 kg*) |
| 1200 | 0 (340 kg*) | 3 (220 kg*) | 3 (180 kg*) |
| 1500 | 0 (430 kg*) | 3 (220 kg*) | 3 (180 kg*) |
| 1800 | 0 (520 kg*) | 4 (340 kg*) | 4 (270 kg*) |
| 2100 | 0 (520 kg*) | 4 (340 kg*) | 4 (270 kg*) |

* Charge uniformément répartie par niveau

Quelques rappels de sécurité :

- Le rayonnage doit impérativement être installé sur un sol plan qui résiste au poinçonnement (sol béton).
- Chargement manuel uniquement (chargement par gerbeur etc., interdit).
- Ne pas modifier la structure ou les éléments du rayonnage.
